DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 13, and 15-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Goldstein (U. S. Pat. 5,410,326).

Regarding claim 1: Goldstein discloses programmable remote control device for interacting with a plurality of remotely controlled devices comprising a wireless transmission/reception unit by which in a first mode, remote control key code information is transmitted to controlled devices; and a display unit, device information for the controlled devices based on control information input in the first mode is displayed, the display unit allowing navigation of the device information (fig. 1, col. 7, lines 4-22). Since the device of Goldstein is a universal remote control to control the audio/video devices and to allow navigation of the device information (col. 3, lines 45-57, col. 7, lines 28-32, and col. 9, lines 1-28), it is seen that the device of Goldstein does also have the second mode in which the device information displayed on the display unit is navigated in order to select the information for one or more desired devices.

Regarding claim 13: All the claimed subject matter is already discussed in respect to claim 1 above.

Regarding claim 15: Goldstein discloses wherein the device information includes device identification information (col. 4, lines 6-10).

Regarding claim 16: Goldstein discloses wherein the device information includes device function information (col. 3, lines 45-51).

Regarding claim 17: Goldstein discloses wherein a display of the device information includes device deleting information for deleting the identification information of devices (col. 32, lines 56-62).

Regarding claim 18: Goldstein discloses wherein a display of the device information includes device function deleting information for deleting the device function information (col. 32, lines 56-62).

Regarding claim 19: Goldstein discloses wherein in the second mode, device information is provided in the form of icons as shown in figure 1.

Allowable Subject Matter

3. Claims 2-12 are allowed.
4. Claim 14 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phung Nguyen whose telephone number is 571-272-2968. The examiner can normally be reached on Monday to Friday from 8:00am to 5:30pm.
